MOHAMED ALI HASSAN

Commercial Data Analyst • Telecom Operations & BI Consultant

Cairo, Egypt • **+20 1070825000** • Mohammedali88899@gmail.com • Portfolio Website • LinkedIn • GitHub • Upwork

EXECUTIVE PROFILE

Commercial Data Analyst with **10+ years of operational leadership** across telecommunications, retail sales operations, and customer retention. Proficient in **SQL (Kimball Dimensional Modeling, CTEs, Window Functions)**, **Power BI & DAX**, **Python (Pandas, NumPy, Seaborn)**, and **Advanced Spreadsheets**, specializing in translating distorted multi-source operational data into executive financial strategies. Proven track record of auditing transaction pipelines, curbing operational bleed, and projecting measurable margin recapture ($300K+). Experienced in leading retail teams, establishing KPI governance, and engineering unit economics (CAC, ROAS, LTV) dashboards for C-suite decision-makers.

CORE TECHNICAL SKILLS

• **Databases & Modeling:** SQL (SQLite, PostgreSQL), Kimball Star Schema Architecture, Surrogate Keys, Data Hygiene Pipelines, CTEs, Window Functions

• **Business Intelligence:** Power BI (DAX Calculated Measures, Time Intelligence, Star Schema Modeling), Executive Scorecards, Zero-Drift Financial Auditing

• **Programming & Analysis:** Python (Pandas, NumPy, Matplotlib, Seaborn), Exploratory Data Analysis (EDA), Statistical Hypothesis Testing, Jupyter Notebooks

• **Spreadsheets & Unit Economics:** Advanced Google Sheets & Excel (Dynamic Arrays, INDEX/MATCH, XLOOKUP), CAC vs. ROAS Diagnostics, Cohort Margin Analysis

• **Commercial Operations:** Sales Operations Governance, Churn & Dunning Mitigation, Return Rate Analysis, RFM Segmentation, Team Leadership (10+ Staff)

FEATURED COMMERCIAL DATA CASE STUDIES

AeroPulse Global: Commercial Operations SQL Modeling & Power BI Architecture | *SQL, Star Schema, Power BI, DAX*

GitHub: aeropulse-commercial-operations-sql-bi • *Portfolio Interactive Case Study*

• **Warehouse Architecture & Data Hygiene:** Ingested 20,611 OLTP line items ($4.82M GMV); engineered a 6-stage SQL ETL pipeline resolving 150 duplicate webhooks, 51 orphaned keys, and non-decimal discounts into a pristine Kimball Star Schema (5 dimensions, 2 fact tables).

• **C-Suite Semantic Engine:** Architected a 31-measure Power BI DAX semantic model with dynamic MoM/YoY growth, category return bleed, and exact $0.00 drift reconciliation against source accounting records across Gross, Net, and Return lines.

• **Operational ROI:** Dissected top-line growth (+21.4%) versus operating margin collapse (-38.6%), isolating an unmonitored 22.5% Smart Home return surge ($153.2K bleed) and discount cannibalization; delivered an executive remediation plan projecting **+$303,000+ in annual profit recapture**.

D2C E-Commerce Sales Performance & Marketing ROAS Hub | *Google Sheets, Advanced Excel, Financial Modeling*

GitHub: d2c-ecommerce-sales-dashboard • *Portfolio Interactive Case Study*

• **Audit & Hygiene:** Audited 3,500 multi-channel transaction records ($296.9K Net Sales), engineering an automated Data Quality Audit Box that isolated and reconciled 30 duplicate entries and 124 missing attribution fields.

• **Unit Economics Auditing:** Evaluated CAC vs. ROAS identities across 5 channels; uncovered repeat-customer margin compression (36.27% vs. 36.95% first-time orders) masked by aggregate blended performance.

• **Financial Impact:** Formulated an executive zero-CAC retention roadmap projected to recapture **$25,000+ in annual profit** through optimized re-engagement workflows and localized discounting controls.

Telecom Customer Churn & Revenue Risk Analysis | *Python, Pandas, Seaborn, Behavioral EDA*

GitHub: telecom-customer-churn-analysis • *Portfolio Interactive Case Study*

• **Data Pipeline & Modeling:** Engineered an end-to-end Python pipeline cleaning and standardizing 50,200 subscriber records; modeled an annual churn revenue loss of **$3,653,533.68** (~$304.5K/month).

• **Behavioral Root-Cause Discovery:** Disproved pricing as churn catalyst; proved attrition surged via payment failures (**+95.0%**) and support escalations (**+74.0%**), isolating a **25.9 vs. 12.8 inactivity day threshold** for early intervention.

• **Retention Roadmap:** Structured a 3-pillar intervention strategy (smart dunning, 14-day inactivity trigger, VIP routing) modeled to protect **$548,030 in annual recurring revenue (ARR)**.

PROFESSIONAL EXPERIENCE

Retail Team Leader | Vodafone Egypt

February 2022 – Present | Cairo, Egypt

- **Commercial Performance:** Leveraged customer purchasing pattern data and segment behavior to guide a retail operations team, consistently exceeding monthly sales quotas by **5% to 26%**.
- **Retention & Attrition Management:** Managed high-value subscriber accounts, applying usage data tracking to detect early attrition signals and delivering a **30% increase in customer retention**.
- **KPI Architecture:** Standardized daily and monthly KPI reporting across product lines (voice, data, fixed broadband) for 10+ retail team members, identifying cross-selling opportunities.
- **CRM Data Hygiene:** Implemented standardized CRM data entry protocols, cutting administrative recording errors and customer profile discrepancies by **15%**.

Outdoor Sales Representative | Arabian Company for Milling and Food Industries

2018 – September 2021 | Cairo, Egypt

- **Sales Analytics & Upselling:** Analyzed B2B client order frequencies and purchasing volumes, applying data-backed upselling strategies to raise average order value (AOV) by **18%**.
- **Account Portfolio Management:** Maintained systematic CRM tracking for 50+ key distributor accounts and conducted competitor price benchmarking to expand regional territory share.

Commercial Operations & Guest Relations Roles | Premier Hospitality Brands

2009 – 2017 | Cairo, Egypt (Fairmont Towers, Intercontinental, Hyatt Regency)

- Built foundational excellence in customer relationship management (CRM), high-stakes service resolution, and operational consistency across international 5-star properties.
- Managed guest profile data, order tracking, and cross-functional team coordination under high-volume commercial environments.

EDUCATION

Bachelor's Degree in Hotels Management

Helwan University**, Faculty of Tourism and Hotel Management | Graduated 2015 | Grade: **Very Good

Relevant Coursework: Accounting & Financial Records, Business Statistics, Marketing Principles, Operations Management, Quantitative Analysis.

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

- **ALX Data Science Program (Machine Learning Track):** Rigorous curriculum covering Python data structures, statistical analysis, and machine learning pipelines (In Progress, 2026).
- **SQL & Relational Data Modeling:** Advanced dimensional modeling (Kimball Star Schema), data hygiene pipelines, and query optimization.
- **Power BI & DAX Professional Specialization:** Dynamic measure branching, time-intelligence modeling, and enterprise executive dashboard design.
- **Python for Data Analysis & Data Cleaning:** Hands-on data cleaning, imputation, outlier detection, and statistical hypothesis testing with Pandas and NumPy.
- **Google Sheets & Excel Advanced Commercial Modeling:** Pivot tables, nested logical functions, dynamic array lookups, and executive dashboard architecture.
